## Reliable Service

Fold New York is a full-service laundry and dry cleaning company that offers a wide range of services to businesses and residents in NYC. We are centrally located and our facility is equipped with the latest energy efficient and environmentally sustainable equipment.

All of our services are offered in-house, without outsourcing, so you can be sure that your clothes will receive the best possible care.

## What is Ozone Wash Technology?

Ozone wash is a revolutionary laundering process that uses a powerful oxidizing gas called ozone.

When the ozone water comes into contact with organic materials in your laundry, it destroys (or "oxidizes") them. That includes bacteria, viruses, mold, or other microorganisms. Ozone also breaks up many inorganic materials, including soils and greases.

## What are the benefits of ozone water washing?

Ozone wash cleans and sanitizes your laundry better. Ozone is such a powerful oxidant that it kills microorganisms 3,000 times faster than bleach. That means ozone wash can help protect you and your clients from bacteria, viruses, and mold that cause illnesses and skin problems. And it doesn't even require hot water or harsh chemicals! In fact, ozone works best in cold water.

**Ozone can effectively kill bacteria as well as Giardia, Cryptosporidium, parasites, fungi, molds and other microbes.** The ozonation standard for killing most organisms is to maintain 0.3 ppm for three-minute contact time.

## Ozone wash is Sustainable and ECO

Ozone laundry doesn't require hot water, which means it consumes less energy. It also requires less chemicals to clean and sanitize effectively, which means less rinsing water is needed and fewer chemicals are discharged into the environment in wastewater.
